

Helping you achieve your financial security goals

With recent increases in property values many people have home equity that could be working for them. Freedom 55 Financial can help make your home equity work for you!

Using your home equity you could:

- ✓ pay off high interest rate debt into a lower rate category
- ✓ maximize your registered retirement savings plan (RRSP) contributions
- ✓ make some non-registered investments
- ✓ fund your children's education
- ✓ complete your overall insurance needs
- ✓ complete home repairs or renovations
- ✓ purchase a big-ticket item (boat, RV, car, truck)
- ✓ set up your emergency savings account

While borrowing to invest can be a powerful means to help build wealth, the risks involved make it a strategy that is not suitable for everyone. I can help you determine if borrowing to invest is a strategy that is right for you.

I can show you how to use your home equity to your advantage.

Achieving your goals and dreams takes careful planning. Together, we can build a financial security plan that's customized for you.
